OpenPGP Options

Support for OpenPGP encryption and signing messages is provided by Enigmail. You need to have GnuPG (gpg) installed in order to use this feature.

- Enable OpenPGP support (Enigmail) for this identity
- Use email address of this identity to identify OpenPGP key
- Use specific OpenPGP key ID (0x1234ABCD):

Message Composition Default Options

- Encrypt messages by default
- Sign messages by default
- Use PGP/MIME by default

After application of defaults and rules:

- sign non-encrypted messages
- sign encrypted messages
- Encrypt draft messages on saving
